ACTEMIUM Marine

"Electrical systems **Partners**"

Our expertise in HYDROGEN integration

Involved in the main French achievements of hydrogen ships, Actemium Marine consolidates its know-how on innovative ships, thus offering a global offer for the control of energy on board.
Projects are currently underway, and many studies are being conducted.

MULTI-SECTOR H_2 REFERENCES

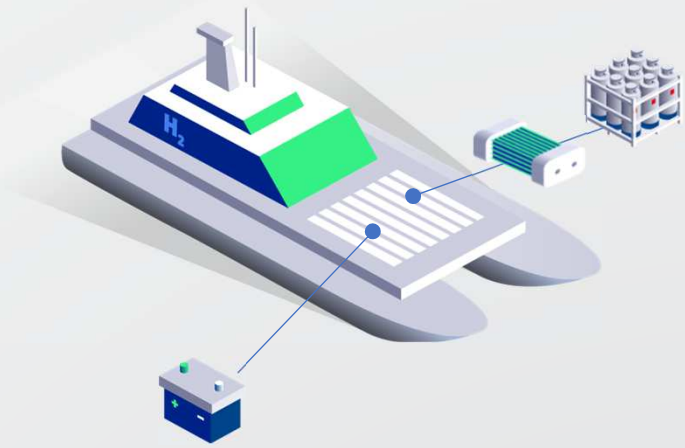

For your new construction or retrofit projects, for any type of vessel, the company offers its expertise and offers you ever more innovative and sustainable tailor-made systems.

Optimized energy production from a fuel cell and/or an energy mix

Integration of energy storage systems, hydrogen fuel cells and associated energy conversions

Integration of hydrogen monitoring and safety equipment
Contribution to the global risk analysis (HAZID)

Development of customizable standardized systems for energy management and operating modes, management of emergency shutdowns associated with hydrogen (ESD), control and monitoring of the H_2 fluid process

- ✓ Energy savings
- ✓ Reduction of the carbon impact
- ✓ Flexibility of use
- ✓ Scalable installation

An ability to lead your project as a whole

From the definition of your need

Engineering · Manufacturing · Integration & Commissionning · Training · Maintenance · Trading
